The Future of SURFACE PROTECTION

Our innovative science outlasts and outperforms traditional, retail penetrating sealers.

We are redefining the quality customer experience, helping homebuilders create a home that will stand the test of time.

We are leading an eco-health movement; creating healthier homes by eliminating the need to use harsh and toxic cleaners.

In an industry where customer service has been all but eliminated, we stand firm in our commitment to the customer experience as the only company that provides a true service warranty.

With a family of surface protection products, we are the only company to offer Total Home Protection, providing our customers with peace of mind.

(888) 998-8787
www.hydroshield.com

ENHANCING THE QUALITY CUSTOMER EXPERIENCE

With HydroShield, the home-building community can redefine how homeowners experience quality. We provide solutions that promise to protect the aesthetics and durability of the surfaces throughout their home – where they measure quality each day.

INDUSTRY-LEADING TRUE SERVICE WARRANTY

With our network of service technicians, along with locally-backed warranties, we enable the home-building community to offer homeowners peace of mind. HydroShield's industry-leading true service warranty program provides homeowners the assurance of guaranteed surface protection long after they have taken possession of their new home.

AN ECOHEALTH HOME

We are proud of the role we play in providing a new and environmentally responsible solution for homeowners.

Reaching beyond energy efficiency, air quality, and responsibly sourced materials, our vision for the future is driven by technology that eliminates the need for harsh chemical cleaners. Not only do these toxic cleaners pose unnecessary health risks to homeowners, families, and pets, but they enter water systems and negatively impact the entire ecosystem through our streams and lakes. By eliminating the need for harsh and toxic chemical cleaners, HydroShield creates a greener, EcoHealth home.

USES

HydroShield for Glass™ has been scientifically formulated to bond to all types of glass surfaces. Protecting shower glass, mirrors, skylights, and windows, our innovative bonding process transforms any glass surface into a highly durable, easy-to-clean, stain-resistant surface.

APPLICATION

Each HydroShield application is completed by a certified and trained HydroShield technician. This ensures proper bonding, guaranteeing our customers long-lasting protection. Every application is backed by the HydroShield “True Service Warranty” program.

HydroShield for Glass™
Watch Video

DESCRIPTION

HydroShield for Glass™ is breakthrough surface protection that transforms glass into a stain resistant, low maintenance surface. Glass has a unique composition, primarily consisting of silica or liquid sand. At the microscopic level, untreated glass has pores or microscopic peaks and valleys. Minerals from hard water, soap scum, and other contaminants settle into these pores and require acidic or abrasive cleaners to remove. Our innovative, one-of-a-kind surface protection creates a covalent bond at the surface-to-air

interface, completely filling in and eliminating the microscopic pores. The result is a high-performance, invisible coating that makes glass surfaces easier to clean, less susceptible to staining, and eco-friendly through eliminating the need to use toxic cleaners. Because of the unique, molecular bond, HydroShield for Glass™ is guaranteed to never evaporate, discolor, flake, chip, or peel. HydroShield provides long-lasting protection, that stands the test of time, providing peace of mind with a single application.

WHAT TO EXPECT

Stain Resistant • Easy-to-Clean • Eco-Friendly • Five-Year Warranty

UNTREATED GLASS

A porous surface with microscopic peaks and valleys.

SURFACE PROTECTION

HydroShield for Glass fills in pores, eliminating microscopic peaks and valleys.

SURFACE EROSION

Microscopic pores create a surface that is subject to staining, damage and bacteria.

COVALENT BOND

Bonding at the surface-to-air interface, creating an ultra-smooth, stain resistant coating that is easy-to-clean.

USES

HydroShield for Granite has been scientifically formulated to bond to granite surfaces. Protecting granite countertops as well as shower surrounds, our innovative bonding process transforms granite into a highly durable, antibacterial, easy-to-clean, stain-resistant surface.

APPLICATION

Each HydroShield application is completed by a certified trained HydroShield technician. This ensures proper bonding, guaranteeing our customers long-lasting performance and durability. Every application is backed by the HydroShield “True Service Warranty” program.

HydroShield for Granite™
Watch Video

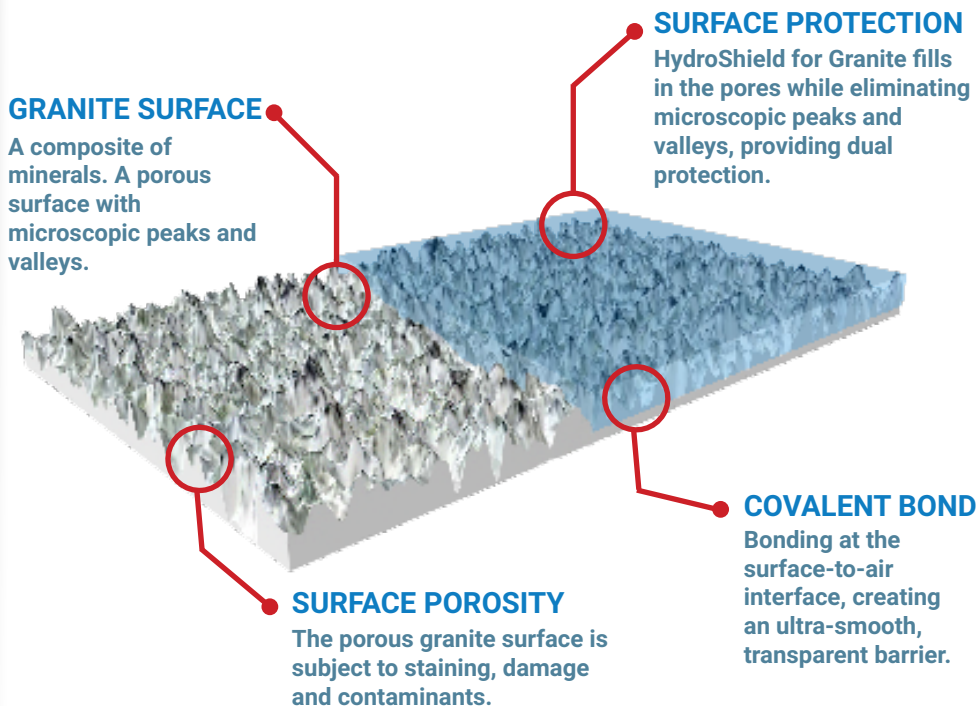

DESCRIPTION

HydroShield for Granite outlasts and outperforms all traditional penetrating sealants. Granite, an igneous rock, is comprised of a combination of minerals, primarily consisting of quartz and feldspar. Because of its unique composition, granite is porous and susceptible to damage. When granite darkens upon getting wet, contaminants are penetrating deep within the stone, this makes the surface vulnerable to staining as well as a breeding ground for bacteria. In the past, traditional penetrating sealers have been used to prevent liquids, oils, and contaminants

from entering the granite. These traditional sealers evaporate and require annual reapplications. Our innovative, one of a kind surface protection creates a covalent bond to the surface. The result is a high performance, ultra-durable, invisible barrier that transforms the surface of the granite. Because of the unique, molecular bond at the surface-to-air interface, our surface protection is guaranteed to never evaporate, discolor, flake, chip or peel. HydroShield for Granite provides long-lasting protection, that stands the test of time, with a single application.

WHAT TO EXPECT

Stain Resistant • Anti-Bacterial • Easy-to-Clean • Up To Fifteen-Year Warranty

HydroShield for Quartz™

HydroShield™
Eco-Friendly Coatings

USES

HydroShield for Quartz has been scientifically formulated to bond to all types of quartz surfaces. Protecting quartz countertops as well as shower surrounds, our innovative bonding process transforms quartz into a highly durable, easy-to-clean, stain-resistant surface.

APPLICATION

Each HydroShield application is completed by a certified trained HydroShield technician. This ensures proper bonding, guaranteeing our customers long-lasting performance and durability. Every application is backed by the HydroShield "True Service Warranty" program.

HydroShield for Quartz™
Watch Video

DESCRIPTION

HydroShield for Quartz utilizes a proprietary covalent bonding process that is revolutionizing the quartz industry.

Our innovative science begins with one of the most common minerals found on earth, quartz. Quartz is a common mineral, made of joined silicon and oxygen, or SiO₂. In making quartz surfaces, ground quartz is introduced to fillers and resins and then compressed into solid slabs.

Our innovative, one-of-a-kind surface protection creates a covalent bond to the SiO₂ network.

The result is a high performance, ultra-durable, invisible barrier that transforms the surface of quartz; providing superior protection.

Because of the unique, molecular bond at the surface-to-air interface, our surface protection is guaranteed to never discolor, flake, chip or peel.

WHAT TO EXPECT

Stain Resistant • Anti-Bacterial • Easy-to-Clean • Five-Year Warranty

HydroShield for Stone™

HydroShield™
Eco-Friendly Coatings 

USES

HydroShield for Stone™ is scientifically formulated to protect all types of natural stone. Our innovative dual protection provides peace of mind, preventing staining and damage.

APPLICATION

Each HydroShield application is completed by a certified and trained HydroShield technician. This ensures proper protection, guaranteeing our customers long-lasting durability. Historically, stone sealants have been a one-size-fits-all approach. Our philosophy is different. As the stone protection experts, we know that every stone we encounter is unique. Based upon stone porosity and stone finish, we will never mark a job as complete until the stone is fully protected. Every application is backed by the HydroShield “True Service Warranty” program.

HydroShield for Stone™
Watch Video

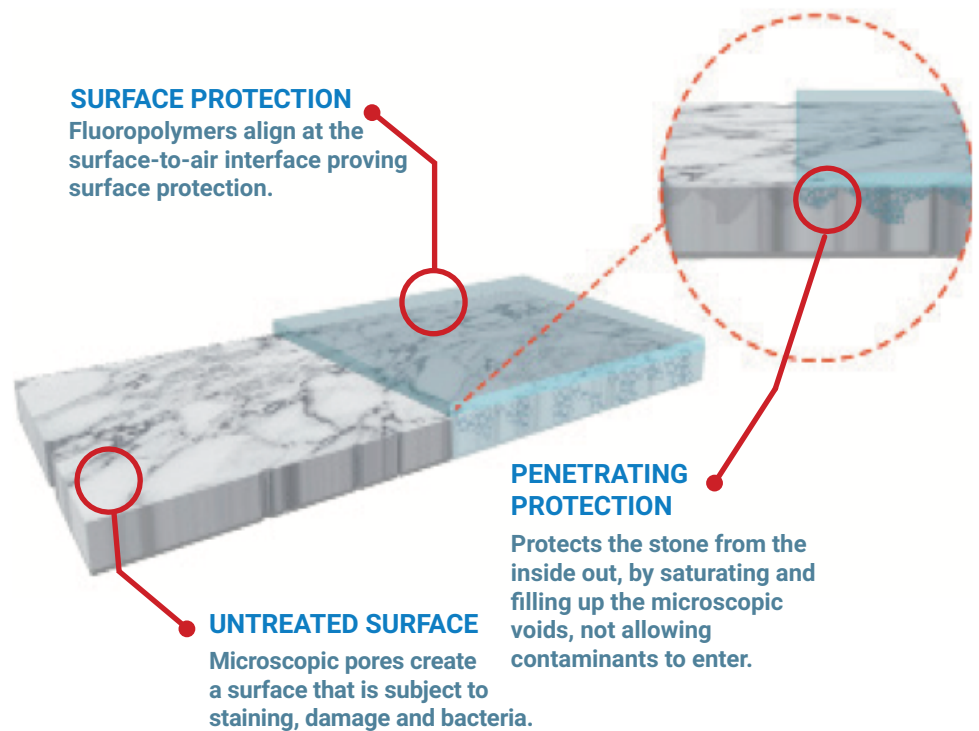

DESCRIPTION

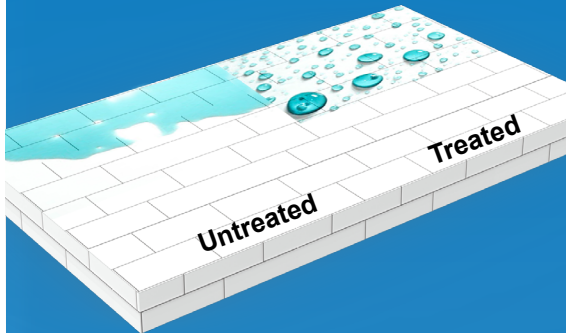

HydroShield for Stone™ is a break-through protection that transforms all types of stone into stain-resistant surfaces. Our innovative dual-layer protection creates a barrier to protect the stone at two levels. The first part of our protection penetrates deep into the surface. This protects the stone from the inside out, by saturating and filling up the microscopic voids inside the stone and not allowing contaminants to enter. The second part of our

protection aligns to protect the stone surface. By incorporating an advanced fluoropolymer that aligns at the surface-to-air interface, HydroShield for Stone™ creates superior stain resistance and durability, and eliminates the need for annual re-applications. Our one-of-a-kind dual protection creates long-lasting durability, that stands the test of time, providing peace of mind with a single application.

WHAT TO EXPECT

Stain Resistant • Easy-to-Clean • Peace of Mind • Three-Year Warranty

USES

HydroShield for Grout™ is formulated to protect most types of grout. Our innovative protection provides peace of mind, and prevents staining, damage, mold, and mildew.

APPLICATION

Each HydroShield application is completed by a certified and trained HydroShield technician. This ensures proper protection, guaranteeing our customers long-lasting durability. Carefully analyzing every type of grout porosity, we will never mark a job as complete until it is fully protected. Every application is backed by the HydroShield “True Service Warranty” program.

HydroShield for Grout™
[Watch Video](#)

CLEAR SEAL DESCRIPTION

HydroShield for Grout Clear Seal™ transforms grout into a stain-resistant surface. Our innovative dual-layer protection creates a barrier to protect the grout at two levels. The first part of our protection penetrates deep into the surface. This protects the grout from the inside out, by saturating and filling up the microscopic voids inside the grout and not

allowing contaminants to enter. The second part of our protection aligns to protect the grout surface. By incorporating an advanced fluoropolymer that aligns at the surface-to-air interface, HydroShield for Grout Clear Seal™ creates superior stain resistance and durability, comes with a three-year warranty, and eliminates the need for annual reapplications.

CLEAR PROTECTION

HydroShield Clear Seal penetrates deep into grout, filling in pores, while providing protection at the surface, creating dual protection.

COLOR SEAL DESCRIPTION

HydroShield for Grout Color Seal™ transforms grout into a stain, mold, and mildew resistant surface. A water base formula containing urethane and hardening agents, our color seal bonds to grout, completely eliminating any pores. By creating an airtight, watertight bond to the grout surface, grout becomes

completely waterproof and stain resistant. By incorporating active mildicides, HydroShield for Grout Color Seal™ ensures long-lasting protection and peace of mind. This product can be color matched to any grout manufacturer's color chart and comes with a warranty up to twelve years.

COLOR PROTECTION

HydroShield Color Seal bonds to the surface of grout, eliminating pores, while creating a completely waterproof surface.

HydroShield for Tile & Porcelain™

HydroShield™

Eco-Friendly Coatings 

DESCRIPTION

HydroShield for Tile & Porcelain™ is a one-of-a-kind surface protection that transforms tile and porcelain into stain resistant, low maintenance surfaces. Both tile and porcelain have an ultra-thin glass coating at their surface. It is this glass finish that gives tile and porcelain their glossy shine. At the microscopic level, untreated tile and porcelain have pores or microscopic peaks and valleys. Minerals from hard water, soap scum, and other contaminants settle into these pores and require acidic or abrasive cleaners to remove. Unfortunately, these types of cleaners wear away and degrade the glossy, glass finish on the surface, leaving an irreparable dull surface that has lost its luster. Our innovative, surface protection creates a

covalent bond at the surface-to-air interface, completely filling in and eliminating the microscopic pores. The result is a high-performance, invisible coating that makes tile and porcelain surfaces easier to clean and less susceptible to staining and damage. By eliminating the need to use harsh, acidic or abrasive cleaners, tile and porcelain retain their shine for years to come. Eliminating these types of cleaners not only protect tile and grout's shiny finish but also create more eco-friendly surfaces. Because of the unique, molecular bond, HydroShield for Tile & Porcelain™ is guaranteed to never evaporate, discolor, flake, chip, or peel. HydroShield provides long-lasting protection, that stands the test of time, providing peace of mind with a single application.

USES

HydroShield for Tile & Porcelain™ has been scientifically formulated to bond to all types of tile and porcelain surfaces. Protecting countertops, shower surrounds, backsplashes, as well as toilets and sinks, our innovative bonding process transforms any tile and porcelain surface into a highly durable, easy-to-clean, stain-resistant surface.

APPLICATION

Each HydroShield application is completed by a certified and trained HydroShield technician. This ensures proper bonding, guaranteeing our customers long-lasting protection. Every application is backed by the HydroShield "True Service Warranty" program.
